## VERIFICATION of INFRASTRUCTURE and HARDWARE at the DIVISION and SCHOOL LEVELS

Eliminate the risk of certifying that the infrastructure and hardware at your high schools meets the specifications for online SOL testing. Let our expert staff assess your hardware and infrastructure. Pearson technicians know exactly what to examine to verify that your high schools are ready for online SOL testing. You can get your high schools certified efficiently, without requiring other technical resources.

As recommended by the Virginia Department of Education, the certification service provided by Pearson Education Technologies includes:

- Testing of your technology infrastructure to determine its ability to support online SOL testing at your high schools.
- Installation of TestNav™, Pearson Educational Measurement's test delivery engine.
- A review with your technical personnel of deployment options, technical documentation, checklists, etc.
- Analysis of infrastructure/hardware test results and development of a brief report outlining findings and any actions required for certification.

Our pricing structure passes on savings to you for multiple schools!

1 High School - \$2,150	4 High Schools - \$4,100
2 High Schools - \$2,850	5 High Schools - \$4,650
3 High Schools - \$3,500	6 High Schools - \$5,000

If your division has more than six high schools, please contact Ed Dekal for special rates.

**Ask about SPECIAL PRICING for consortiums and adjoining divisions ordering together!**
